

Divyansh Sharma

Software Developer & Android Engineer | Scalable Systems & Problem Solving | Data Structures & Algorithms

+917742738143 ◇ divyanshsharma5070@gmail.com ◇ Kota, Rajasthan, India ◇

<https://www.linkedin.com/in/divyansh-sharma-12a52028a>

SUMMARY

Software Engineering student with strong foundations in Data Structures, Algorithms, and OOP, proficient in C++, Java, and Kotlin. Experienced in building scalable backend systems and real-time applications using REST APIs, Firebase, and SQL databases. Proven ability to design clean, efficient, and modular code with full SDLC ownership. Currently expanding into iOS development (Swift/SwiftUI) to build cross-platform solutions. Self-starter with strong analytical, problem-solving, and communication skills.

SKILLS

Languages C++, Java, Kotlin, Swift

Frameworks & Tools Firebase (Firestore, Realtime, Auth), Git, Jetpack Compose, Play Console, SwiftUI, Xcode

Core CS Data Structures & Algorithms, Object-Oriented Programming, DBMS & SQL, Operating Systems (basics), System design (basic), Unix/Linux (basic)

Architecture MVVM, Clean Architecture (basic understanding)

Backend & Data REST APIs, SQL, Database design, API design

Languages English — Professional, Hindi — Native/Fluent

EXPERIENCE

Founding Developer | Android Engineer

Jan '25 — Present

Campus Eats (Self-Initiated Product)

Chandigarh, India

- Built and deployed a production Android app delivering real-time hostel meal updates to 50+ users.
- Designed **scalable backend systems using Firebase and REST APIs**, ensuring low-latency data synchronization.
- Applied data structures, algorithms, and problem-solving to handle concurrent updates and maintain data consistency.
- Developed **modular architecture using OOPS principles**, improving maintainability and speeding up feature delivery.
- Managed full **SDLC** and collaborated with users to enhance features, demonstrating strong teamwork and communication skills.

PROJECTS

LeetCode Consistency & Learning App (iOS)

Feb '26 — Present

- Built an iOS application using Swift and SwiftUI to track daily problem-solving progress and maintain coding consistency.
- Designed features to **store, revisit, and compare problem-solving approaches** with peers, enabling quick revision and collaborative learning.
- Developed a **clean and intuitive UI** with a focus on usability, ensuring seamless progress tracking and consistent engagement.

Smart Community Health Monitoring

Sep '25 — Nov '25

- Implemented real-time sensor streaming pipeline using Firebase Realtime Database to enable low-latency monitoring and timely alerts.
- Designed data ingestion and synchronization strategies to maintain consistency across devices and backend services under concurrent updates.
- Applied problem-solving and algorithmic thinking to handle concurrent data updates and ensure system reliability.

EDUCATION

B.E. in Computer Science, Chandigarh University

Aug '23 — Present

Senior Secondary (Science), L. Zebra Public School

Apr '22 — May '23

CERTIFICATIONS

Create the User Interface in Android Studio, Meta

Mar '26

Android Development with Jetpack Compose — Udemy

Nov '24

AWARDS

Smart India Hackathon 2025 — Top 45 Teams

Jan '25

Inter-department Badminton Tournament — Winner

Jan '25

SGFI-Certified National Badminton Player — 2025

Jan '25
